Hybrid Topology
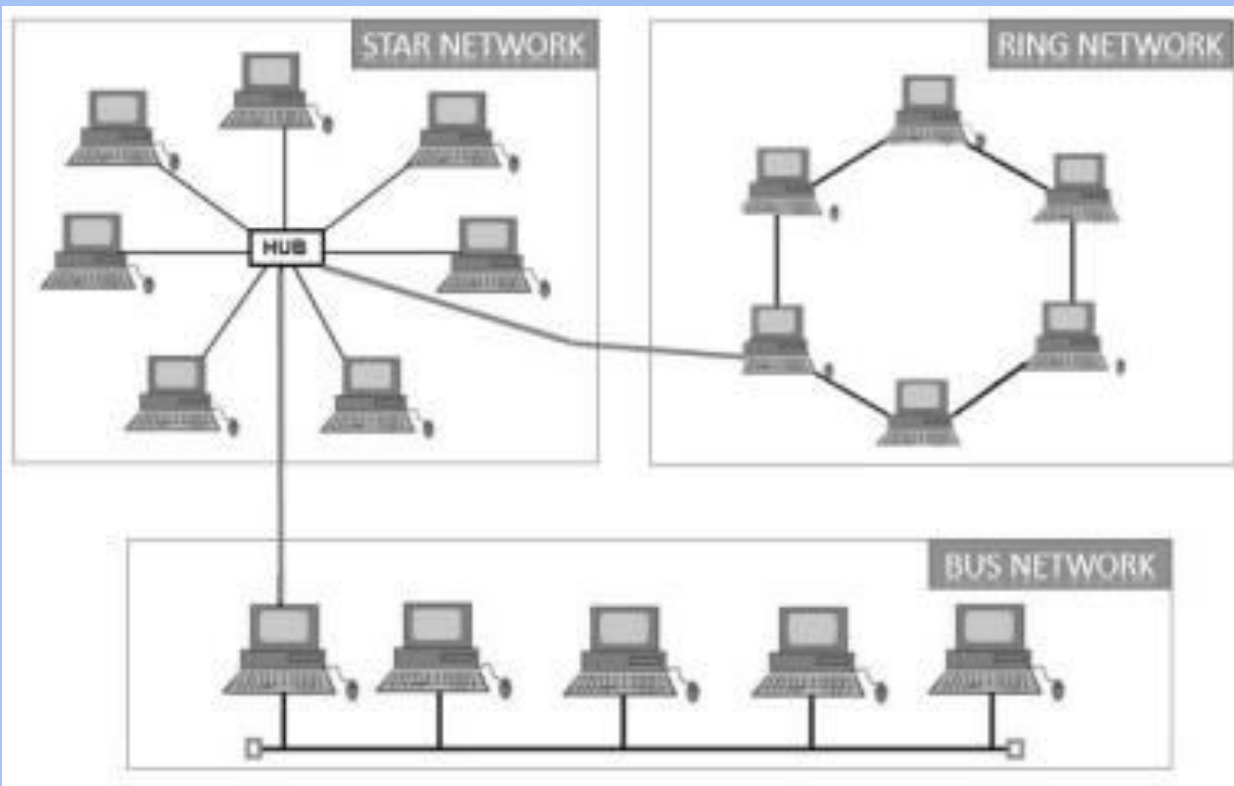

Elementrix Classes

Hybrid Topology

❏ Hybrid Topology is a combination of one or more basic topologies.

❏ For example if one department in an office uses ring topology, the other departments uses star and bus topology, then connecting these topologies will result in Hybrid Topology.

❏ Hybrid Topology inherits the advantages and disadvantages of the topologies included.

STAR NETWORK

HUB

RING NETWORK

BUS NETWORK

Advantages of Hybrid Topology	Disadvantages of Hybrid Topology
1. Reliable as Error detecting and trouble shooting is easy.	1. Complex in design.
2. Effective.	2. Costly
3. Scalable as size can be increased easily.	
4. Flexible.
