**Elementrix Classes**

# Structure of C and C++

## Structure of C Program

Collection of functions

```
Void main() ← Entry point  
{  
    call the functions from here  
}
```

## Structure of C++ Program

```
class Example
```

```
{
```

```
    Collection of functions and variables
```

```
};
```

```
Void main() ← Entry point
```

```
{
```

```
    create the object of the class
```

```
    using the object invoke the functions in the class
```

```
}
```
